control flows

if

if-else

elif

nested conditions

```
a = 10
b = 50
print('python')
print('django')
a > b
print('html')
```

```
python
django
html
```

```
a = 100
b = 50
print('python')
print('django')
if a > b:
                              print('html')
```

```
python
django
```

All the lines in a block of code should follow same level of indentation

```
a = 10
b = 50
print('python')
print('django')
if a > b:
                    print('html')
                    print('css')
```

```
python
django
```

```
a = 100
b = 50
print('python')
print('django')
if a > b:
  pass
```

```
python
django
```

```
a = 20
b = 20
print('python')
print('django')
if a - b:
  print('html')
  print('css')
```

```
python
django
```

```
print('python')
print('django')
if '''@''':
  print('html')
  print('css')
```

```
python
django
html
css
```
